# Find Out More

Israel has established a body of laws, policies, and practices that systematically oppress Palestinians and violate their fundamental human rights.

Across historic Palestine, Palestinians face discriminatory treatment, dispossession, and the violation of their human rights by Israel, within a system of entrenched ethnic privilege. This system amounts to the crime of apartheid under international law.

Israel can only maintain its repressive system because of support it receives from companies and financial institutions around the world

Research by Palestine Solidarity Campaign has found that:

- 85% of LGPS funds analysed invest in companies listed on the UN Office of the United Nations High Commissioner for Human Rights list of companies active in Israel's illegal settlements.
- 90% of funds invest in companies supplying Israel with weapons and military technology used against the Palestinian population.
